**Prices include planting locally. Cash and carry
at the nursery 20% discount.**

TERMS—Cash, unless you have established credit with us.

LIABILITY—Orders are accepted subject to stock on hand and unsold, with the understanding that they shall be void should injury befall the stock from flood, drought, fire, frost, or should our operations be impaired by labor shortage or any other condition beyond our control.

GUARANTEE—We will resupply one time, without cost, plants that die prior to June 1st following date of planting.

We will resupply one time, at one-half price, plants that live through June 1st following date of planting but die prior to one year after original planting date. The above guarantee does not cover planting in June, July and August, which is guaranteed for only 30 days.

All guarantees are predicated on the assurance by the purchaser that the plants have been properly cared for and that the plants have been paid for within 30 days of the date of planting.

Absolutely no claims for full replacements will be considered after June 1st following date of purchase.

HEIGHT AND CALIBER—Height of plants is considered from the ground level to the tip of the plant. (Does not include ball of earth.)

In low growing varieties of plants spread is considered instead of height. Caliber is the method used for measuring larger deciduous trees. Caliber is the diameter of the tree at a point one foot above the ground.

WATERING—We have found that more plants are lost from failure to water properly the first year after moving, than from any other cause.

Do not drown the plants, but do see that they get some water (twice a week) from late May until October.

FERTILIZING—Well rotted manures make fine food for plants. This should always be applied on the surface in a circle around the plant, as a mulch.

Ordinary soil will probably keep your plant healthy and growing. Mulching will greatly aid the plant in its color and vigor, as it also holds moisture around its roots.

BROADLEAF EVERGREENS

There are large numbers of plants in this group. They include plants of a wide variety of sizes, shapes and textures. Within this group you can find a plant suitable for nearly any location. Broad leafed plants are generally very free from disease. They grow best in a soil rich in humus, acid, and moist.

Abelia, Glossy

ABELIA GRANDIFLORA

Graceful drooping stems and branches. Dark, glossy leaves. Bell shaped flowers of white, tinted pink, from May to October.

Barberry, Tricanthophora**BERBERIS TRICANTHOPHORA**

Neat compact habit. Leaves white underneath in contrast to green upper foliage. Hardy, Evergreen.

18-24"	\$5.50
24-30"	6.50
30-36"	9.50

**BOXWOOD—VIRGINIA GROWN**

Boxwood has long been one of our specialties, as it has been and still is, aside from its sentimental and historic value in association with Virginia, the most practical, durable and beautiful plant that can be used. Its use will add dignity and charm to any home or garden. We have several hundred thousand plants in the various sizes of our own growing besides a quantity of specimen collected plants of both dwarf and bush types.

Boxwood, Bush**BUXUS SEMPERVIRENS**

Small elongated dark green leaves. Compact. Glossy. Thrives in shade.

THE HOLLIES

This year we are offering a more complete selection of the hollies than we have ever had to offer before. The past growing season has been wonderful. We can furnish well branched, stocky hollies that are sure to thrive. The diversity of foliage, and the variety of plant forms make these evergreen hollies one of the best landscape materials that can be used. These plants are entirely hardy in this area.

Holly, American**ILEX OPACA FEMINA**

BROADLEAF EVERGREENS (Continued)**Yucca, Bear Grass or Adam's Needle****YUCCA FILIMENTOSA**

Stiff upright leaves. Flowers creamy white on spikes.

Small Clump	\$1.25
Large Clump	2.00

**AZALEAS AND CAMELLIAS**

The Azalea and Camellia are broadleafed evergreens that are distinguished by their free flowering qualities. They are very sensitive to dryness. They grow best in an acid sandy soil with plenty of humus. A heavy mulch of pine needles or peat moss will hold moisture in summer and protect the roots from freezing in winter.

Azalea, Amoena, Red

Bright red flowers in masses. Small green leaves in summer. Foliage bronze in fall.

10-12" Spread	\$2.75
12-15" "	3.50

Azalea, Amoena

Mass of bright rosy purple flowers in May. Foliage green with a bronze tint in fall.

SHADE AND FLOWERING TREES

One of the most attractive sights in summer is an area of cool shade. The natural beauty of a tree is something hard to describe. In home landscaping the use of shade trees for accent, background, screening, and shade is one of the most important considerations.

The following list of trees are those that will grow well in this locality.

Planting. To insure successful results the ground should be well prepared before planting, enriching, if necessary, with well decayed manure which should be well mixed. The hole should be dug at least two feet wider than the diameter of spread of the roots of the tree planted and about an inch deeper than the nursery soil line indicated on the stem. The roots should be spread out in a natural way, filling in with fine soil, and pouring in several buckets of water to run the soil to the roots. It is advisable to stake trees to prevent wind-shake until they attach themselves to the ground. Also we want to emphasize the necessity of a mulch after planting. This consists of straw (or similar material) placed around the base of the tree about 6 or 8 inches high and a little wider than the width of the hole. Allow this to stay on one year and it will practically insure the tree's life.

Ash, European Mountain

SORBUS AUCUPARIA

Small leaves in fronds. Orange red fruit in early Fall.

4-5'	\$ 5.00
5-6'	7.50
6-7'	10.00

Birch, European White

BETULA PENDULA

White bark and spray like branches make this tree most attractive.

DECIDUOUS FLOWERING SHRUBS

The planting of hardy shrubs has now become so important that we have provided a full assortment of the most choice and desirable varieties. There is almost an indefinite number of species, from which, after careful trial, we have selected those varieties which we consider the most desirable for general planting.

Pruning Shrubs. Many persons trim and shear shrubs into regular shapes, imagining that regular outline adds to their effect and beauty. While symmetry and regularity of form are to be admired in a shrub this quality should never be gained at the expense of health and natural grace. Each shrub has its own peculiarities of habit and foliage, and we should aim to preserve these characteristics as far as possible. Judicious pruning to secure health and vigor is necessary but trimming all kinds of shrubs into one form shows a lack of appreciation of natural beauty, to say the least. The old growth should be occasionally thinned out and the suckers and root sprouts removed when they appear. The best time, however for pruning all shrubs is when they are done flowering.

We are growers of shrubs in a large way, and have as nice, vigorous plants as can be obtained anywhere. All shrubs are dug fresh from the nursery when shipment is made.

Almond, Pink Flowering

PRUNUS GLANDULOSA FLORA PLENA

In full bloom before leaves appear. Dwarf, bushy, compact.

2-3'	\$2.50
3-4'	3.50

Althea, Rose of Sharon

Abundance of bloom from July to September. Beautiful screen or hedge. Pink or purple.

3-4'	\$2.50
4-5'	3.50

Barberry, Red-Leafed

BERBERIS THUNBERGI ATROPURPUREA

Distinct red foliage. Becomes more red in summer. Berries remain in winter. Very hardy.

18-24"	\$2.00

CLIMBING VINES AND GROUND COVERS

We list here vines and ground covers that have proven successful in this area.

Clematis

CLEMATIS PANICULATA

Old fashioned. Small white flowers in mid-summer.

2 Year Plants \$1.50

Carolina Jessamine

GELSEMIUM SEMPERVIREN

Evergreen. Long narrow leaves. Bright yellow flowers. A climbing shrub.

Four Inch Pot \$2.50

Hypericum, Calycinum

Low growing, dwarf, ground cover. Use in full sun or semi-shade. Spreads from root runners to make carpet of green foliage with golden flowers.

4 Inch Clump \$1.00 Ea. \$10.00 Doz.

Ivy, English

HEDERA HELIX

Evergreen vine. Dark green leaves. Climbs on brick or stone. Excellent ground cover.

Strong Pot Plants

40¢ each \$4.50 Dozen \$35.00 per 100

Ivy, English, Cutleaf

HEDERA HELIX GRACILIS

A small star-shaped leaf. Veins seen in leaf. Good green.

40¢ Each \$4.50 Dozen \$35.00 per 100

Liriope, Majestic

Attractive grass like foliage. Lilac purple flowers above foliage in summer. Fine border plant to withstand either sun or shade.

30¢ Each \$3.35 Dozen \$25.00 per 100

Liriope Japonica

MONDO JAPONICUM

Very low growing. Narrow leaves. Excellent border and rock garden plant. Good ground cover for shady places or in sun.

30¢ Each \$3.25 Dozen \$25.00 per 100

VINES & GROUND COVERS (Continued)**Pachysandra Terminalis**

Will form a dense evergreen ground cover. Useful for covering ground beneath trees where grass will not thrive.

2 year plants 2½" Pot

40¢ Each \$4.50 Dozen \$35.00 per 100

Preparing beds Extra.

Periwinkle**VINCA MINOR**

Fine leaf, deep green. Blue flowers in spring. Makes mat of ground cover.

Strong Clump

30¢ Each \$3.25 Dozen \$22.50 per 100

Preparing beds extra.

Purple Leaf Winter Creeper**EUONYMUS COLORATUS**

Evergreen. Long narrow leaves, purple tinged. Effective ground cover.

Strong Pot Plants

40¢ Each \$4.50 Dozen \$35.00 per 100

Rose, New Dawn

Easily grown trailing rose. Flowers light pink in bud, ivory when open.

2 Year Plants

\$1.75

Wisteria, White**WISTERIA SINENSIS ALBA**

Grafted white to insure bloom. Large white flowers.

2 Year Plants

FRUIT TREES

APPLES

The varieties offered below are some of the best known and proven sorts. Clay or clay loam is the best soil for growing apples. The land should be plowed well and deep before setting the trees. It should, of course, be well drained and kept thoroughly cultivated.

	Each
4-6 ft. -----	\$3.50
6-8 ft. -----	5.00

Summer Apples

EARLY HARVEST. Medium to large, bright yellow, tender, juicy, well flavored. Ripens early June and lasts 2 to 3 weeks.

Winter Apples

DELICIOUS. Medium to large; roundish, skin dark red with yellow background. A heavy bearer and good keeper; extra fine.

YELLOW DELICIOUS. A very fine apple, similar to the Delicious in flavor and time of ripening.

MAMMOTH BLACK TWIG. A seedling of Winesap; fruit darker red and larger size; strong, upright grower; fine flavor. One of the best Apples.

STAYMAN'S WINESAP. Also a seedling of Winesap; dark red, firm flesh, fine grained, crisp, sub-acid; quality best; strong grower.

WINESAP. The old-fashioned Winesap. No better apple to be had; needs no description.

PEACHES

A well-drained, sandy loam with a clay sub-soil is an ideal soil for the Peach; however, the Peach has the faculty of adapting itself to almost any soil, provided it is well drained.

3-4'	\$2.00
------	--------

GOLDEN JUBILEE. A high quality, early, yellow, free-stone peach. The value of this peach to the Eastern and Southern grower cannot be estimated. A typical Elberta type fruit, highly colored, ripening before Carman or about four weeks before the regular Elberta.

FRUIT TREES (Continued)

BELLE OF GEORGIA. Ripens the first to fifteenth of August. Fruit is large, white with red cheek; flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

ELBERTA. Midseason. A valuable large peach, of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

CHERRIES

Sweet Cherries

BLACK TARTARIAN. Late, large, black, tender, juicy. July.

4-6' Trees \$3.00

Sour Cherries

MONTMORENCY. Largest and strongest grower of all sour cherries. Red. June.

4-6' Trees \$3.00

PEARS

4-6' Trees \$3.00

BARTLETT. Large, yellow, most popular. August.

KIEFFER. Large to very large; skin yellow with a light vermillion cheek; flesh brittle; very juicy, good quality. Begins to bear at 3 to 4 years old. One of the surest bearers.

SECKEL. Of delicious, sweet flavor; melting; tree a stout, slow grower. August.

PLUMS

4 to 6 ft.-----\$2.50

ABUNDANCE—Botan. One of the oldest and best known Japanese varieties; hardy, productive. Fruit large, lemon yellow with heavy bloom; good quality. July.

FIGS

ITALIAN. Large, sweet, firm fruit. Hardy. Fruit from July to frost.

CELESTIAL. Smaller fruit, very sweet. Hardy.

2-3' \$3.00

3-4' 4.50

4-5' Italian only 7.00

Not guaranteed against winter damage.

FRUIT TREES (Continued)**GRAFTED PECANS**

Where soil and climatic conditions are proper, it has been practically demonstrated that Pecan-growing is a paying investment; but only grafted or budded trees of well-known and meritorious varieties should be planted. We are only offering the Stuart, which seems to be best suited to this section.

3 to 4 ft. trees	-----	\$5.00
4 to 5 ft. trees	-----	6.00

STUART. Nut large to very large; $1\frac{3}{4}$ to $2\frac{1}{8}$ ins. long; thin shell, very good quality, heavy bearer; excellent.

GRAPES

No part of the fruit garden yields a richer harvest than the vineyard. Along almost any garden fence or walk there is room for vines enough to furnish luscious grapes from July to November.

Well rooted vines			
Cash & Carry	\$.75 Ea.	\$ 7.50 Doz.	
Planted	1.00 Ea.	10.00 Doz.	

Black Grapes

CONCORD. Large bunch and berry; one of the best and most popular old sorts.

FREDONIA. Improved Concord. Large bunches. Sweet.

Red Grapes

CACO. A new variety which is proving to be one of the best. It is wine-red with abundant bloom; the berries are very large; bunches medium in size, compact and of good form. Ripens almost with Concord.

White Grapes

NIAGARA. Bunch medium to large; berries large; skin thin with a whitish bloom; tender and sweet.

Muscadine Grapes

Strong, 2-yr. plants—Planted-----\$1.50

JAMES. Berries very large; blue-black in clumps of from 4 to 10; skin thin; pulp tough, sweet and juicy, quality very good. A showy variety.

SCUPPERNONG. Berries large; seldom more than 8 or 10 to a cluster; color brown, skin thick, flesh pulpy, very vinous, sweet, and of a peculiar musky aroma. We have grown this grape successfully in our Nurseries and find it free from disease and insect depredations and a fairly good bearer.

FRUIT TREES (Continued)**BLACKBERRY PLANTS**

These require but little attention, producing good crops of fine berries. They are native to the Piedmont section, and will give excellent results with but little care except keeping the weeds and grass out, in addition to removing the old canes. No staking required.

ELDORADO. A strong, upright grower; large juicy berries.

Strong Plants \$2.50 Dozen; \$15.00 Per 100

RASPBERRIES

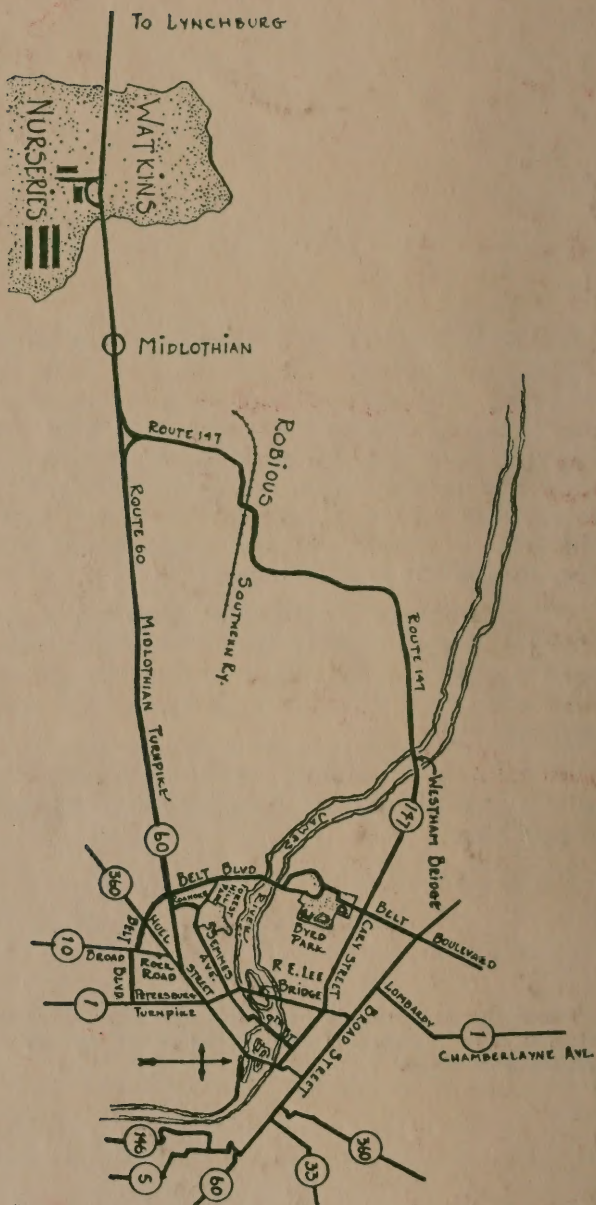

Raspberries will succeed in any good soil suitable for garden vegetables, and amply repay high culture. The best fertilizer is ground bone. Plant in rows 4 feet apart and plants 3 feet apart in the rows. Pinch tops out of young canes when 3 feet high, so they will branch and become stocky. Cut out all old wood which dies as soon as the fruit all ripens.

INDIAN SUMMER. Red.

CUMBERLAND. Black.

Strong Plants \$2.50 Dozen; \$15.00 Per 100

LOCATION—We are located 12 miles west of Richmond on U. S. 60, which goes through our nursery. Route 147 over the new Westham Bridge connects with U. S. Route 60 approximately 5 miles from our nursery and is the nearest route from the West End of Richmond.
